SCULPTURED STYLING that performs SMOOTH -- SLEEK, SHARP AS A SHARK! ... cruises wide open to the fishing hole. SNEAKY -- SLINKY, SLIPPERY AS A SALMON! ... glides stealthily in and out and round about, THAT'S YOUR SKEETER.

Designed by real sportsmen for successful sportsmen ... and enjoyed by all skippers afloat.

The SKEETER's low silhouette, with safety-flared deck and sides puts you within easy pick-up of your catch or decoys. The SKEETER comfortably seats two fishermen and the SUPER SKEETER seats three or four. The center seat in the SUPER SKEETER is removable.

The SKEETER maneuvers easily with all types of small outboard motors and can easily handle large motors up to and including the 25 hp. class ... up to 35 hp. on the SUPER SKEETER.

Trailing is no problem with a SKEETER. It loads and unloads easily on and off a standard rig.

Fire retardant interior base coating of polyester plastic is just one of the built-in safety factors ... adds years of safe boating with your SKEETER.

Torture-tested hull has bottom of fine quality Ecuadoran balsa wood, solidly encased in fiberglass. This construction, usually found in only the most expensive runabouts, is an extra dividend of rigidity, stability and flotation.

Seats are an engineered combination of plywood and fiberglass. Designed especially for years of rugged use, they are foam-filled for additional safety flotation. Height of seats assures day long fishing and hunting comfort. Boat chairs may be attached without bothersome modification. Transom is constructed of plywood and fiberglass, laminated to withstand motor stresses.

NOW, YOU CAN DESIGN THE INTERIOR OF YOUR SKEETER BOAT!
Take a look at these accessories ...
WHEEL MOUNT NOW AVAILABLE!

A compact steering wheel mount capable of driving the Skeeter with larger motors is an added feature to the Skeeter line. A side installation, it is fastened to both the boat floor and the gunwale and can be mounted on either side in front of the rear seat. Mount is of fiberglass in the same molded-in colors as the Skeeter and the Super Skeeter, and can be used in either boat.

DESIGNED ESPECIALLY FOR FISHERMEN AND HUNTERS

SKEETER STABILITY... BUILT IN!

We don't actually recommend that you stand up and run around on the gunwales of your Skeeter Boat - - - but if you just have to it can be done! This picture shows 450 pounds of fishermen standing on one side of a Skeeter - - - with no tipping, no bucking, no sliding out from under them. From the inch-thick balsa wood sandwich bottom, the foam-filled seat boxes, right on to the very gunwale design at the top of the deck, your fiberglass Skeeter Boat is designed with your safety in mind... it's on the water with you 100% of the time.
Order your Skeeter Boat with this roomy compartment installed out of the way under the deck of your boat. Thirty inches long with heavily chrome plated brass hinges. Have all the extra storage room you need for foul weather gear, extra propeller, spare anchor line... all the items you like to carry but don’t want rattling around in your boat.

Just fasten the swiveling base of your present boat chair to the solid one-inch plywood base of this contour seat molded of fiberglass in the color of your Skeeter. The best prescription ever for solid comfort on that all-day trip.

Battery Case Hold-Down Block
Solid plywood laminated with fiberglass to the bottom of your Skeeter Boat. Keeps your battery where you want it... out of your way, held securely.

Fuel Tank Holder
The most pleasing boat to operate is a well balanced boat. Place your fuel tank exactly where you want it with the Skeeter Fuel Tank Holder. Laminated to the bottom of your Skeeter Boat with fiberglass, with open end for rain water drainage.

Trolling Motor Mounting Block
More and more fishermen all over the country are using the bow suspension mount model of the Motor Guide Trolling Motor designed for the Skeeter Boats by the Herschede Hall Clock Company of Starkville, Miss. This solid plywood section, permanently fiberglass to the under side of the bow of your Skeeter Boat assures quick, easy installation of your Motor Guide. The Motor Guide Trolling Motor is not available from Stencol Marine, but can be procured from any of our Skeeter dealers.

Now... Positive Remote Steering from the front seat of your Skeeter Boat!
Custom designed especially for the fiberglass Skeeter Boat, “Jim’s Stick Steering” is available from REEVE’S MARINE CENTER, 3210 Lakeshore Drive, Shreveport, Louisiana. Available in kit form and easily dealer-installed, it provides unobstructed control from the bow of either the Skeeter or Super Skeeter Boat.

Rod Racks for your Super-Skeeter
For a small extra charge, you can order your Super-Skeeter Boat with BOTH the removable center seat and a set of these Pflueger molded plastic rod racks that securely hold four casting or spinning rods.
Skeeter and Super-Skeeter Boats
