Skeeter ... the legacy of a legend.

The Original Skeeter Bass Boat was designed and produced over thirty years ago in Shreveport, Louisiana by Holmes Thurmond. Little did he know that his innovative design would have a major influence on the boating industry, as well as become the foundation of the new Skeeter Company.

A little over thirteen feet long, and made entirely of marine plywood, the original Skeeter had a flat bottom, slanted sides and a pointed bow. Fiberglass, when introduced to the marine industry, was easily adapted to the Skeeter design and greatly influenced the popularity and recognition of Skeeter boats.

In the 1950's the creation of many man-made lakes, or reservoirs, placed new demands on boating manufacturers in the form of speed, stability, and convenience and comfort of design. The Super Skeeter skimmed the water surface at unparalleled speeds of over 30 m.p.h., but with the introduction of competition or tournament fishing, even faster speeds were expected. The Skeeter Hawk was the answer to competition requirements ... its design altered the pointed nose of the original Skeeter, had sponsors at the bow, and a raised front platform for more comfortable fishing. The demand for the Hawk by tournament guides and fishermen gave Skeeter a dominant position in the boating market.

With bass fishing reaching epidemic proportions, many Bass Clubs were organized, leading to more competition and new requirements by fishermen. Faster, larger boats, capable of handling the worst possible lake conditions were of the highest priority. We took the biggest gamble in our history with the introduction of our "ultimate" boat, the Wrangler, created to dominate the new market. The showdown took place at Toledo Bend Reservoir at the Bass Anglers Sportsman Society (B.A.S.S.) Tournament in 1975.

The Wrangler was radically different ... wider than its forerunners, with a sponsorless "vee" hull design and the first horsepower rating of 150. Only Skeeter's reputation for producing superior boats kept the pros from laughing the Wrangler off the lake. The fisherman's biggest foe -- the weather -- was in full force for the Wrangler's debut on the first day of the tournament. A howling "norther" stormed across the lake throwing four foot waves. At blast-off, the Wrangler rose high on its pad, the occupants riding smooth and dry, while the conventional boats fought for stability and control. Our gamble paid off ... during the next five years, over twenty-one boat manufacturers tried to copy or imitate the Wrangler.

In the late 1970's the fishing public again turned to Skeeter for new and dynamically different designs. In response we introduced the futuristic Starfire with a unique patented hull design that allowed maximum stability at any speed plus superior cornering ability. "Bassmaster" Magazine has called Skeeter boats "radically different new boats -- machines that might well change the way bass rigs look and run." Our latest innovations, developed for the serious bass fishermen, are the 200 Series and the System Series.

The Skeeter reputation for quality fishing boats will be perpetuated and Skeeter products will continue to improve through tournament competition and angler's suggestions. So come join the Skeeter team ... our future is bright and we invite you to be a part of our success.

Specifications and features subject to change without prior notice. Photographs may show optional equipment and may show overpowered conditions for photographic purposes.
When bass fishermen talk, Skeeter listens. Introducing the all new 200 Series ... world class boats with scorching speed ... and style! Declared "fastest boat in the fleet" in Popular Mechanics' "Bass Blasters" Comparison Test.
It's fast ... it's exciting ... it's fun!
It's the all new 200 Series and best of all ... It's Skeeter!

We set out to build the world's premier bass boat, assuming nothing and questioning everything. We were meticulous, exacting, not easily pleased. Only the best of the best would be good enough. The result is the 200 Series – an unparalleled engineering achievement.

The 200SX and 200DX are more than bass boats. They are sport bass boats endowed with so many features that they can be called luxury bass boats. Each model incorporates all the features required of a Skeeter high performance bass boat, plus innovations in size, styling and storage capacity tailored to the highly specialized sport of bass fishing.

At 19 feet, 7 inches, the sleek, modern 200s are custom made for today's bass tournaments. We have reduced the drag coefficient of this all new hull, making it America's most aerodynamic and allowing it to handle weight without sacrificing speed. The new 200 hull slips through the water as easy as a torpedo, and attacks the chop like a cutter. Of course, our design not only offers this beautiful, fast ride, it is also extremely fuel efficient.

The 200s are configured to easily accommodate two tournament fishermen, with plenty of room for more. The boats provide exceptional fishability, with spacious front and rear decks, and ample floor space.

Our attractive and elegantly contoured interior received the same high degree of attention as the sleek, innovative exterior. The steering console and instrument panel are thermoformed of ABS coated with thermoformed vinyl. A convenient center ice chest is easily accessible from console seating. Ergonomically designed vinyl upholstered seats and fishing chairs are stylishly coordinated with the gelcoat accent color, and upgraded carpet completes the feeling of comfort and luxury.

Front deck storage includes two carpeted rod boxes that easily hold dozens of rigged rods and feature lids that open to the outside. Roomy front tackle storage holds five magnum boxes upright for easy removal. Two more compartments in the rear deck hold three magnum boxes each or loads of other gear. Bench seat storage includes a special box designed to hold a spare propeller, as well as an additional storage compartment. Many compartments are carpeted and all are fully insulated. Compartment lids are also insulated with Thermal Lock, keeping contents warmer in winter and cooler in summer, eliminating condensation and reducing harmonic noise. Pneumatic spring lifts on the lids assure easy, quiet operation.

The 200 series also features two 15.5 gallon, independently plumbed, specially aerated livewells. A venturi pulls air into the system, mixing it with water as air is pumped into the livewell. This system is especially crucial to assure live fish at the weigh-in. Underwater lighting in the livewells allows for night fishing, facilitates fish culling during the day, and also lights the rear storage area.

Sleek styling, design innovation, attention to aesthetics and subtle touches make the 200 Series from Skeeter the overwhelming choice of professional bass fishermen everywhere.
In addition to being the fastest boat in the fleet, it was voted 'best dressed' by the test team for an outstanding level of fit and finish.

Fish with the best!
The 175 Series gives you more of what you want on the water ... ferocious performance, fishability, and a whole lot of fun!
Rated #1 by Popular Mechanics' "Battle of the Bass Boats."
When you're in the market for a standout fishing rig, look no further than the 175 Series from Skeeter ... The first choice of many top professionals.

175s have been setting the pace for high profile tournament fishing since their introduction. In these demanding competitions, boats are run to their full potential. There's no place for compromise, and that's when our obsession with excellence comes through. Nimble and powerful, these relentless performers move effortlessly over the water while maintaining outstanding control and safety. Their exceptional maneuverability puts you right where the fish are, and their exhilarating speed gets you home in a hurry.

With their classic lines and futuristic styling, 175 Series boats are guaranteed to turn heads. Developed by leading tournament fishermen, the 175s offer a variety of layouts designed to please the most exacting professional. All models feature ample fishing space from both front and rear decks. Dual aerated livewells keep your fish fresh on the way to the weigh-in or the frying pan. Traction Grip bow mats lend an added measure of security in slippery conditions. Ergonomically designed seating ensures comfort for driver and passenger alike. Padded instrument panels with full instrumentation keep you abreast of running conditions and convey critical operating information. Courtesy lighting illuminates the interiors for added convenience and safety at night. F Models also contain a convenient, built-in ice chest for perishables. All models are designed with ample front and rear storage, including lockable rod and tackle compartments and additional dry storage areas. Top it off with plush, fade resistant carpet and you have a combination that will be the envy of your fishing buddies for years to come.

It's said true strength comes from within, and that venerable adage rings true with the 175 Series as well as all the other boats we build. A boat is no better than the hull it runs on ... that's why at the heart of every Skeeter you'll find our exclusive Diamond Core pad.

Constructed of eight layers of fiberglass plus a solid end grain balsa core, this superior pad offers more rigid running surface than other boats, minimizing the stress factors that can result in handling problems at high speeds. The Diamond Core is the foundation of our award-winning, hand-laid hull, long recognized as the finest in the industry.

Skeeter continues to set the standard with the legendary 175s. Proven design, superior materials and unequalled construction detail are combined in these tough and reliable beauties. They have surpassed all expectations in the most rigorous testing arena imaginable ... the real world of competition bass fishing ... and emerged the unquestioned champions. So, whether you're a seasoned fisherman out for something bigger and better, or a first time buyer anxious to start out right, you owe it to yourself to experience the 175 Series ... long live the legend!
"Originality has always been a Skeeter trademark ... always developing new and different concepts in bass boats."

[Image of a boat with people on it]
Looking for a bass boat with non-stop performance? You’ve come to the right place! The Skeeter 150/140 Series has a model that’s tailor made for you.
All the spirit and punch of the top gun
Skeeter on a slightly smaller scale!

A winning combination of comfort and quickness, the 150/140 Series is proof positive that, no matter what the size, we don't let up on our commitment to design excellence and construction detail. In fact, it's even more important on a scale where every inch counts! Like all of our boats, the 150/140 Series is based on the cumulative experience of the past ... a blend of traditional craftsmanship and technologically advanced construction methods. The Skeeter touch is clearly evident in their uncanny balance of smooth ride and exceptional feel for the water. Sensitivity and responsiveness combine with power to produce a remarkable ride that's nothing short of unique.

Each model in the 150/140 Series is configured to match its own special style, a custom blending of shared features and details unique to each model. All boats provide generous front and rear casting decks for outstanding fishability. Aerated livewells preserve your fish in the top condition required for catch and release competition or good eating. Beautifully styled, ultra-soft vinyl seats and fishing chairs provide more comfort and back support than other seats on the market.

For your convenience, all 150/140 Series boats offer carpeted, lockable rod and tackle boxes, along with recessed dry storage caches for the extras ... spare propellers, life jackets, foul weather gear ... whatever items you wish to keep handy and protected. In addition to full carpeting, rod boxes are totally insulated with our exclusive Thermal Lock system, keeping moisture out and reducing temperature fluctuation. And, to underscore our response to customer requests, many compartments now feature our new positive locking system for added security.

Depending upon the model, consoles are either the time-tested, traditional configuration or the contemporary, ergonomic design ... either way you'll enjoy a proven winner for convenience, comfort and control. All interior elements are smartly coordinated to complement the gelcoat color, sequin stripes and hull graphics.

Quick and classy, tough and durable, the 150/140 Series models are the unquestioned choice of sportsmen who insist on superior style and non-stop performance at an affordable price. We know what you want in a boat, and that's what we deliver. Because it's from Skeeter, you can always expect the best. We know how to make it perform ... and we know how to make it last!
"The unquestioned choice of sportsmen who insist on superior style and non-stop performance at an affordable price."

Fishing ... skiing ... or just cruising for fun ... the versatile SD Series delivers hours of pleasure. You'll find so many ways to enjoy these relentless performers that the big question around your house will be "Who's got the boat?"
A sleek and sassy combination of power and style, the SD Series from Skeeter is the ultimate argument for a split personality.

Equally at home on the fishing grounds or the ski run, these boats are a natural choice for family fun. We combined ultra-modern materials, computer-aided design, leading-edge production technology, traditional craftsmanship, and a liberal dose of old-fashioned intuition to create dual-purpose boats that don’t skimp on the details. From design concept to the smallest construction detail, every aspect of every boat is carefully scrutinized to maximize performance and reliability. Our diligence means that you can relax and enjoy a ride that’s safer and more fun. So no matter which SD Series Model you choose, you’ll enjoy the same superb quality that is synonymous with Skeeter.

The lightning quick 150FS is a favorite of fishermen and skiers alike. Its unique hull design provides awesome out of the hole performance for plenty of pulling power and exceptional stability for pure, flat out running. The 125FS and 80FS are designed to deliver quickness, agility and control with fewer horses, a boon to the family finances.

The 150FS and 125FS come equipped with walk-through windshields for easy bow access and excellent protection from wind and bow spray, recessed, fully carpeted ski/rod storage and deluxe upholstered seating. Carpeted front casting decks, aerated livewells, and removable fishing chairs stand ready for service when the fish are biting and all models have several dedicated storage areas for boating essentials and personal items. Options include a durable, eight gauge, chromed steel tow bar and a powerful AM/FM stereo cassette music system that will make you the envy of everybody at the marina. The 80FS offers many of the same appointments on a smaller scale. At 15’3”, it’s a trim craft with plenty of go when matched with a 90 horsepower motor. An 80FS is the perfect choice for the family that wants to enjoy all the style of a Skeeter and still watch the budget.

If you prefer an SD Series boat that’s for the more serious fisherman, check out the 125 and 80 models. They’re a couple of hot performers, and share the same fine features and quality construction as the rest of the line. Quick response and exceptional maneuverability with lower horsepower engines increase fuel economy without affecting overall performance. Both models provide generous, roomy front casting decks, aerated front and rear livewells, ample rod and tackle storage, and plenty of dry storage for all the extras. Color coordinated, fade resistant carpeting and supple vinyl upholstery complete the stylish appointments.

Whatever your choice, the SD Series will get you there in the finest style and provide years of all-around family enjoyment. Exhilarating performance, bold, sculptured lines, and the mastery of craftsmanship that is the very foundation of our reputation prove once again that Skeeter reigns supreme in the boating industry.
"A favorite of fishermen and skiers alike ... plenty of pulling power and exceptional stability for pure, flat out running."

A new breed of boat designed for the sporting angler ... the System Series answers the call for versatility and precise control without sacrificing speed and comfort.
When serious sport fishermen said they wanted a boat for any kind of fish in any kind of water, Skeeter took up the challenge.

We polled top fishermen to get a feel for the ideal craft — one that would accommodate a wide range of fishing styles — and the System Series for the sporting angler was born.

Whether you’re out for walleyes, stripers, crappie, redfish or muskie, there’s a boat that’s tailored to the way you fish. With rugged strength and classic design, the versatile System Series will surprise the most practiced veteran. They’re engineered for precise control (a must for successful fishing) without sacrificing speed and comfort, and dressed out to facilitate the myriad techniques fishermen use to stalk a prize.

Since a small kicker outboard is sometimes preferred to an electric motor, the transom on some models is set up to accommodate both. Roomy and functional, the 135, 135D, and 135T feature four hatches on the forward deck platform: a dry storage compartment, a 52-inch insulated livewell (with divider), battery storage and built-in baitwell. Rod and electronics lockers are strategically placed within easy reach of the back seat fisherman. All boats are generously carpeted with ample floor space for comfort and the look and feel of luxury.

The 135 and 135D are operated from a compact steering console protected by a windshield that keeps out the bowspay in adverse conditions in addition to sheltering a space for additional electronics. These exceptional boats feature a non-pivoting helm seat for added safety. Tilted forward, the seat reveals an insulated cooler that’s easily accessible from the rear seat, and perfect for drinks or, in warm weather, for keeping nightcrawlers fresh and lively.

Our tiller-operated 135T is lean and mean without feeling stripped — an exceptional value for the fisherman who wants System Series quality and performance in a more traditional design. Built to the same exacting specifications as the rest of the series, the major difference you’ll experience is in the steering configuration ... and that leaves a lot more room for fishing!

The System Series 50s are directed toward the sport fisherman who wants a lot of boat in a smaller package. Perfect for the economy minded, this peppy rig delivers many of the fine features of the larger System boats at a lower price.

So, if your tastes run to sport fishing and year-round enjoyment, you owe it to yourself to take a ride ... and find out what "Skeeter Style" is all about.
"Engineered for precise control without sacrificing speed and comfort ... a boat that's tailored to the way you fish."
